

## SAP Case Study - Munjal Showa Limited

Munjal Showa Limited, manufacturer of Shock Absorbers, is one of the leading companies in the Indian automotive ancillary sector. Munjal Showa's manufacturing unit is located in Gurgaon, Haryana, India.

The complexity of operations in Munjal Showa Limited was typical of a Discrete Manufacturing automotive industry.

The SAP implementation undertaken was a Full Cycle Implementation as per the ASAP methodology.

The modules covered are FI/CO, MM, SD, PP, QM, PM and the India specific Localization module – CIN.

All the major business processes except the HR functions were covered during this implementation. Some critical and non-standard business processes that were addressed during the implementation were:

- In MM, the Imports Procurement Cycle with the facility of an Automated Invoice Verification for Customs Duties.
- In QM & SD, development of a Comprehensive Warranty Module.

The total Project Implementation time was seven (7) months and the total number of consultants involved at any point of time was ten (10), which included 1 BASIS Consultant and 2 ABAP Consultants.

Consultants from Herosoft, the Enterprise-oriented and Solutions-provider segment of Hero Corporate Services Limited were involved in the Full Cycle SAP Implementation as well as the Post Go-Live Support and the preparation of Work Around and Enhancements.
